### Houston HVAC Contractor Offers Bail Out To Homeowners

Houston, TX, March 24, 2009 – The banks are getting a bail out, local government gets a bailout, why not Northwest Houston Homeowners? With rising electric, natural gas, and gasoline costs, even an affordable state like Texas is not immune to the economic pinch. As a community service, Aardvark A/C & Heating has teamed up with American Standard to present a bailout for Northwest Houston Homeowners in providing a contest that will help lucky homeowners lower their utility bills through energy conservation.

Utility companies consistently account 70-80% of your electric bill to a central air conditioning and heating system. Through the use of proper design and installation a high efficiency system can significantly reduce a home's electric costs.

One deserving Northwest Houston homeowner will discover the dollar saving benefit of an American Standard high efficiency system coupled with today's advanced comfort technology + up to \$1,500 dollars in Federal Energy Tax Credits! With this Home Energy makeover, no longer will they have to worry about possible repairs or the stress of high electric bills. For more information visit online at <http://www.aardvarkcares.com/bailout/>

### About Aardvark A/C & Heating

Aardvark A/C & Heating was founded in 1986 by John and Jeanine Guerry. Our first years here at Aardvark A/C were marked by a period of rapid growth and expansion in residential service and equipment retrofitting.

Our customers were drawn to us mainly by the referrals of their friends who liked our honest, friendly service, and our top quality equipment installations. Since then we have moved to a bigger headquarters and expanded to the fields of air balancing, indoor air quality issues, and energy audits.
