### Aardvark A/C & Heating Launches website as Houston's Heating and Air Conditioning Resource For Homeowners

Houston, TX, November 11, 2008 – Aardvark A/C & Heating today announced the launch of [www.aardvarkcares.com](http://www.aardvarkcares.com) as an information portal for Houston home owners to find information about indoor air quality and educational information in regards to their heating and air conditioning systems. With articles being added almost every day and an online monthly newsletter of home improvement tips the website is anticipated to quickly become Houston's primary resource web site for home comfort and energy efficiency.

Future plans include educational awareness guides on heating and air conditioning in your home, professional advice from expert contractors, and a question and answer forum for Houston homeowners.

The web site will be an invaluable resource for Houston homeowners in finding accessible information to address their HVAC needs for their home. Not only will the Houston website be addressing home safety, but also new energy efficient solutions, that will benefit homeowners in the duration of owning their home.

Denae Keutzer, of Aardvark A/C & Heating stated, "Our goal is to offer the most educational information for Houston homeowners by providing them with informative and professional articles and resources, which will make [www.aardvarkcares.com](http://www.aardvarkcares.com) a portal worth visiting and using to better make homes safe and energy efficient.

### About Aardvark A/C & Heating

Aardvark A/C & Heating was founded in 1986 by John and Jeanine Guerry. Our first years here at Aardvark A/C were marked by a period of rapid growth and expansion in residential service and equipment retrofitting.

Our customers were drawn to us mainly by the referrals of their friends who liked our honest, friendly service, and our top quality equipment installations. Since then we have moved to a bigger headquarters and expanded to the fields of air balancing, indoor air quality issues, and energy audits.
